

Fall Foliage 2017

NCECBVI in Nebraska City

Thursday, October 26 (8:30-4:00)
and Friday, October 27 (8:30-noon)

Presenter: Millie Smith

Private Consultant for Students with Visual and Multiple Impairments, and creator of the Sensory Learning Kit

Join us on Thursday, October 26 to learn more about the unique educational needs of students with visual and multiple impairments. When their present levels of performance are at the sensorimotor stage, regardless of chronological age, they learn about their worlds and develop basic skills by participating in experiences that allow for them to use sensing and acting systems. Barriers to learning imposed by sensory, cognitive, and motor impairments must be overcome by teams of professionals who can use research-based strategies to design highly effective instructional activities.

On Friday, Millie will be sharing information about a Functional Vision/Learning Media Assessment tool she is developing for students with multiple disabilities.

Cost: \$75.00

Registration information is found on the NCECBVI website or by clicking the link below:

<https://goo.gl/forms/Mi5YrAXuAVqQSfs12>

Registrations are due by October 18.
